

The allowance of a few media entities to control a large segment of media outlets defies "COMMON SENSE". I cannot understand why such a notion would even be debatable. Why would any person or group want to receive their news from one limited viewpoint? I do not want my information to come from the corporate controlled media of these United States. I have recently been made aware of the fact that Birmingham, AL media is controlled by a few firms. Common Sense, ethical and moral decency should dictate the laws in the country - not the undemocratic American media.

Thanks-
